

FIRST AID

Helping people in first aid circumstances is serious business and one should know their capabilities as they get involved. Herbal and essential oils have been effectively treating people in these situations since there have been injuries to treat. One should wholeheartedly hone their skills, know how and when to ask for help and to take time to study with knowledgeable persons.

First aid situations have a habit of foisting themselves upon us at unpredictable moments and so you may find yourself involved, no matter what your skill level may be. So seek opportunities to learn this eons-old craft whenever possible. The service of being a calm, sensible, knowledgeable person in often chaotic and painful situations is a gift to offer to our communities.

The First Aid suggestions here are not intended to treat, diagnose or prescribe. They are intended for your better understanding of using essential oils in situations where injury has occurred. Seek qualified medical assistance as soon as possible to avoid unnecessary complications. NOTE: it is always good practice to have an essential oil pocket reference book in your first aid kit. <http://aromatherapy4u.com> or <http://essentialscience.net>

Abdominal Pain - DiGize (Topical or Internally)

Acid Upset - Sulfurzyme

Asthma - Ravensara, Chamomile, Eucalyptus radiata, Idaho Balsam Fir, Peppermint, Thyme, Lemon, Lavender, Mountain Savory. Blends: Di-Gize, Rurification, Thieves, Raven, R.C. (Topical soles of feet. Internal drops in capsule)

Animal Bites and Scratches

Animal bites and scratches should be treated promptly and aggressively, especially if they are deep enough to draw blood, as bacteria are often deposited into these wounds leading to secondary bacterial infection.

Categories for treating bites and scratches:

1. Absorbents - bind with infectious organisms. Toothpaste, Clay
2. Antiinflammatories - reduces inflammation
3. Antimicrobial - kill infectious agents. Thieves
4. Antiseptics - cleanse wounds. All essential oils are antiseptic.
5. Astringent - tighten tissues.
6. Immunostimulant - stimulates immunity.
7. Pain Relievers - Valerian, Clove
8. Hemostatics - arrests bleeding - Helichrysum
9. Trauma Aids - reduces emotional shock and restores mental balance. Trauma Life, Chamomile, Lavender
10. Vulneraries - aids tissue recovery. Helichrysum, Lavender,

Therapeutic Approaches to Animal Bites and Scratches

1. Treat obvious symptoms - bleeding (hemostatics) and pain.
2. Apply immunostimulating and antimicrobial oils.
3. Soak, apply, or compress to affected part twice daily for 3-4 days.
4. Apply bandage, taking the pressure of further inflammation into account.
5. Internal antibiotics and Immune stimulating - Inner Defense, Thieves, Lemon
7. Unwrap twice a day checking for signs of infection. Apply fresh dressing after each unwrapping.

Spider Bites

Black Widow

Get victim to hospital immediately. Rub Lavender on bite location every 2-3 minutes until you reach the hospital.

Brown Recluse

Seek immediate medical attention. Purification, Thieves (1 drop of either every minute until you reach the hospital)

Trauma and Wound Care

1. Level-headedly assess any trauma situation for its potential seriousness. Decide your priorities and seek or send for help if warranted.
2. Be VERY cautious when moving anybody who has suffered from a fall or accident. If they have a spinal or neck injury, moving them can worsen their injury

considerably.

- 3.** If working with other people's blood, saliva, pus or other bodily secretions, protect yourself by wearing disposable gloves.
- 4.** After initially testing a remedy and finding it acceptable, increase dosage cautiously while supervising their condition and tolerance. REMEMBER: essential oils are highly concentrated and potent, a little goes a very long way, so more is not always the best answer.
- 5.** When using tinctures containing alcohol or ethanol, ask the patient if they have an allergy or strong reaction to such mixtures.
- 6.** Ask the patient if they have any allergies to any plants or herbs.
- 7.** Test remedies for acute pain situations with a one-drop dosage.
- 8.** Learn and practice wound wrapping techniques.
- 9.** When choosing your remedies, consider various herbal categories to draw your selection.
- 10.** Always remember to DILUTE with a carrier oil any essential oil that is considered "HOT" - such as: Clove, Cinnamon, Thyme, Oregano, Cayenne. However, a carrier oil should NOT be used in a situation where an open wound is the injury.
- 11.** When entering a trauma situation, try to find a competent person to assist you or run for help if needed.
- 12.** Individual adverse reactions to pain relieving herbs are common. When initially administering essential oils internally start with a one-drop dosage of tincture or apply a couple drops on the soles of the feet (remember: if in doubt here to apply an essential oil, chose the soles of the feet).

Nervine Tea/Drink/Capsule

Essential Oils - Melissa, Chamomile (1- 2 drops is usually sufficient)

Anti-infection Tea/Drink/Capsule

Essential Oils - Thieves, Lavender, Mountain Savory, Lemon, Clove (1 drop of any of these is usually sufficient).

Cold and Flu

Immune Booster and Antibiotic Substitute essential oils - Lemon, Mountain Savory, Cinnamon and Oregano in capsule.

Natural Antibiotic Capsule - Lemon (10 drops), Mountain Savory (8 drops), Oregano (3 drops).

Or, Clove (8 drops), Thyme (5 drops), Oregano (5 drops).

Anti-fungal essential oils - Thieves, Cinnamon, Oregano

Influenza

Influenza is a viral infection and conventional antibiotics effective against viruses. Anti-microbial capsule - Thieves (12 drops), Oregano (6 drops), Frankincense (2 drops).

Broken Bones

A health professional should always be involved with setting of a broken bone. This blend applied topically can help speed bone mending: Wintergreen (10 drops), Helichrysum (3 drops). Lemongrass (2 drops), Pine (3 drops), Ginger (4 drops), Vetiver (4 drops) (apply 2 -8 drops on break area, watch for skin sensitivity, add carrier oil if needed.)

Burns

All burns can be serious, therefore seek medical attention if necessary. If the burn is large or severe the victim may go into shock. Inhaling essential oils may help reduce shock.

First-Degree Burns (Sunburn)

Essential Oils - Lavender, Helichrysum, Rose, Melaluca ericifolia. Blends: Gentle Baby, Melrose. (Topical: neat or dilute 50/50)

Spray with LavaDerm Cooling Mist immediately and as necessary to cool the area. Use Lavender-Rosewood Soap or Peppermint-Cedarwood Bar Soap only after burn has started to heal 24-48 hours.

Second-Degree Burns (Blisters)

Spray immediately with LavaDerm Cooling Mist 4-5 times every hour and follow with 2-3 drops of Lavender essential oil. On days 2-5, mist every hour and follow with 2-4 drops of Lavender essential oil. Continue using LavaDerm 3-6 times a day until healed. Apply Rose Ointment to keep tissue soft.

Third-Degree Burns

Seek immediate medical attention.

Spraying LavaDerm on the burn every few minutes for the first 24 hours will help tissue rehydrate. Applying Lavender essential oil after misting will help the healing process.
